# HOW BIG DO BEAGLES GET?

[www.thepetsupplyguy.com](http://www.thepetsupplyguy.com)

How to choose a good beagle puppy. How to discipline a beagle puppy. How to prepare for a beagle puppy.

Understanding the characteristics of Beagles Before Beagles made their way into our homes, they were originally bred for hunting. For all our puppies, my husband and I went together to collect our puppies. Their kibble doesn't have any grain, gluten, or white Potato. In terms of how much to feed, all kibble brands will have a feeding guide either on the product itself or on their website. Choose a quality brand, that includes high-quality, natural, human-grade ingredients. The journey to collect the puppy Firstly, make sure you have someone with you if you are driving to collect your puppy. Sharing them, should help prepare any first-time Beagle owners for this fun but sometimes challenging experience. There are many choices of kibble, ranging from low-budget to high-cost premium brands. Sleeping ItemDescriptionAverage costCrate - Folding metal typeBeagles adapt exceptionally well to crates with the right training. Step 5: You should start to notice she starts to sit down quickly as you raise the treat over her head and sit for longer. There are times I choose not to take my beagle to places if I'm concerned the location isn't 'beagle' friendly. They will happily take food from a child's hand! Again, being very greedy, often if children are in your house or you are visiting friends or family with children and they are eating food. Secondly, don't leave them unsupervised and if you catch them chewing, say a firm 'Leave' to them. Here's how to do it: Make sure your crate is set up, is placed in a quiet spot in the house and has a vet bed or blanket inside it. Pop your puppy inside the crate, leave the door open and with praise give her a treat. they will look for food. Beagles are well-known escape artists, and they can get through gaps in fences, hedgerows, and under gates. Do supervise your puppy; they might decide to chew it, remove the stuffing and eat it. Make sure it's a clean and friendly environment to bring your puppy into. The puppy shouldn't be left for long periods and will need the training to get her used to being left alone for short periods. To start with, she will try to

follow you, say the command 'stay' firmly. So, make sure you have plenty of poop bags, the biodegradable ones are the best as they are more environmentally friendly, but these are not so environmentally friendly. The Beagle is a generally healthy breed with an average lifespan of 13-15 years. So, give her lots of cuddles and speak to her gently, reassuring her she will be OK. \$5/E\$KongRougs are excellent rubber toys that can be stuffed with treats. In terms of how much you feed, Nutrient Raw advises feeding 5-6% of your dog's weight daily. Dry kibble/biscuit Kibble is another word for a dry biscuit and is the most popular type of food for dogs. Age of BeagleFrequency of Feeding 8 - 12 weeks\$3 - 6 months\$3 6 - 12 months\$2After 1 year\$2Beagle feeding schedule table Keep an eye on your beagle dog if she's looking fat or thin, alter the weight of the food you give her. As you back away and she doesn't move, in a higher pitch say the command 'come' and use your hands to encourage her towards you. Beagles are stubborn and free-spirited, which makes training them a challenge. Your puppy will probably try to chew both you and things like items or even furniture. Their merry, energetic and stubborn nature is quite charming and funny when I look back but living with this day to day can prove challenging particularly if you have never owned a Beagle before. They are into absolutely everything! Being hounds and extremely greedy, Beagles will continuously be looking for opportunities to sniff out food or things they think are food. Exercising your puppy The first 8-14 weeks before your puppy is fully vaccinated, exercise will mainly play. All my dogs have had their personalities, but there are certain Beagle traits that I've seen in all of them. Firstly, the food will be easy to take as younger children will be at the right level for the theft! Secondly, the Beagles just know they can get away with it with kids. Kongs are quite good toys that Beagles can chew, and they don't fall apart. Avoid busy roads with cars and pedestrian areas with lots of people. Health & wellbeing ItemDescriptionAverage costRegistering with a local VetI would look to find a vet, a friend, or a family member has recommended. If you stick to it, you can have your beagle dog puppy house trained in 3 months. You can either prepare the raw food yourself by purchasing all the ingredients from a supermarket or butcher. This may seem funny, but the reality is there might be food that they should not eat as it's poisonous or not even food. Plus, they are a great way to play tug of war or fetch with your pup.\$10/E6 Baylee (right) and Bracken playing nicely. As soon as this happens, give her lots of praise and let her eat the treat out of your hand. Over time exposing your pup to these kinds of situations is essential but should be done when they are a little older and more experienced. When out on the walk, if it's safe to do so, let your puppy meet both people and other dogs. Raw food diet There are many health benefits to feeding a raw diet; they are: Shinier coatsHealthier skinCleaner teethHigher energy levelsSmaller and stiffer poops A raw diet consists of raw meat, bones, some fruits, and vegetables. I've written this based on what I've learned and what has worked well with all four of my adorable Beagles. Give her a treat through the crate and then immediately let her out.The trick is to repeat this step and slowly build the time up she is in the crate. From my personal experience, I would strongly recommend it. Check they look healthy and have a good temperament. Best way to find a Beagle puppy in the UKBest way to find a Beagle puppy in the USThe Kennel Club (UK) - to find professional Beagle breeders - WebsiteAmerican Kennel Club - to find professional Beagle breeders - WebsiteBeagle Welfare - is UK's leading Beagle Re-homing charity - WebsiteOne Green Planet - this is a great post that lists a number of Beagle rehoming charities located across many states in the US - Website Please be very wary of some 'breeders' who are running puppy mills or farms; they can offer dogs that they claim are pedigree at lower costs to reputable breeders. She will also want to relieve herself after sleeping, playing, and feeding. However, they have chewed some of our belongings, such as I-phone, designer shoes, sunglasses, and headphones. To start with, she may stand up, don't give her the treat if she does this. Make sure you or a family member stay with her while she's getting used to her surroundings. b) Lie down Get some tasty treats and place one in your hand ready.Make sure your puppy is sat down, and you are at the same eye level, it makes this training a little easier for you.Lower your hand with the treat in it to the ground between her front paws and close to her nose. Someone will need to hold her on the journey home. It's a good idea to continue that food. You need to stay strong, the moment you go to see her, she knows crying gets your attention, and you will end up having a Beagle sleeping with you for the rest of your life! Eventually, they will fall asleep. You may hear them again later in the night; the challenge is to work out if they are crying because they need the toilet or for attention. A puppy's skeletal system does not fully develop until 18 months old, so playing should not be overdone. They will also be able to advise you on vaccinations require. Pet InsurancePet owners can have quite different views on whether pet insurance is worth having. Unfortunately, in all cases, they are not pedigree, and worse will have underlying health issues as the conditions and practices to breed dogs are inappropriate and cruel. Buying a puppy Deciding on whether to buy or adopt is also another critical decision to make. You can order these online or local pet stores will supply them. You will get to shape your own little Beagle. Both in the US and UK, Beagles and other dogs would be used to hunt small prey such as rabbits, hares, and even squirrels. Crate training All our beagle puppies have been crate trained; it's an effective aid to use for training your puppy. \$7/E7Rope ToyThis is a twisted rope toy, relatively durable. I would not recommend extendable leashes, I did try to use these with Bracken and found them impossible to use for leash training.\$10/E8CoatLike the collar, I would wait until you have your dog before you purchase a coat for them. This has been hugely beneficial for them when they become adult dogs, and I can simply call the word, and they will go (helpful when you are in a rush!). Tip No 4: The trick is to be consistent with your pup and disciplined to take them out regularly. If you are happy, usually the breeder will ask for a deposit, and already born, they may let you choose. But don't let that worry you, with the right preparation and approach, owning a pup can be both fun and rewarding for you and the family. Make sure your other dog has his or her own space and sleeping quarters. If you wish to change it, maybe wait a couple of weeks, ensuring you introduce food over three weeks; otherwise, they will have an upset stomach-Puppy treatsFish skins are a great healthy treat. American Kennel Club The Beagle has consistently been one of the top ten most popular US dogs since it was first registered with the American Kennel Club in 1885. There are puppy variants available; however, I question the quality of the ingredients and the level of preservatives in the food. Keep introductions low-key to avoid overwhelming them. First, choose the designated area your puppy will go to to relieve herself. The key thing is to have a tired puppy at the point you put them to bed. A growing puppy needs to have a balanced and healthy diet, and therefore I wouldn't recommend feeding your puppy with this type of food. Tip No 5: Your puppy should be adequately house trained by the time it is six months old. Y Finding the right beagle for you Finding the right pup is critical and probably the most crucial step in this post. They are customizable, and I would recommend\$5/E8Leash (Nylon)This should be a short leash, nylon, or leather. Crate training your puppy is relatively easy to do, requires commitment, and shouldn't be rushed. Using a rope toy and playing tug of war, for example, is a great way to exercise your pup. If you catch them chewing something appropriate like a toy, do give her praise. There is also an indication of the cost you might pay for these items. It took a few weeks before Bracken accepted the new puppy in our lives. A newborn beagle will need to be fed regularly, socialized, and let out regularly for house training. There are plastic chew bones available, but I have found with these toys, bits of plastic break off, which isn't suitable for your puppy. Never leave your pup unsupervised in the backyard. This is bad behavior and has to be discouraged. These are eleven steps you should consider before bringing your Beagle home: Beagle puppies are just adorable but are highly energetic and mischievous too. So, choose an area to walk your puppy that is quiet and not overwhelming. Like many other dogs, they do love to sit on your lap or be sat next to you, they love the contact. I find putting on headphones and listening to music helps to avoid the temptation of going to see them. Crate training is based on the fact your puppy will not want to soil in her sleeping area. She should raise her head and follow the treat in your hand. Some parents choose to use training pads and initially train indoors. Not only was she getting used to being in the crate, but she also associated the crate with something rewarding. The journey home with your puppy With all of our puppies, I always pop a blanket on my lap and hold the puppy. Bringing a Beagle puppy home for the first time can feel exciting but somewhat daunting too. Puppy teeth are pretty sharp, as adults, we can just about take it, but for children, it's a lot worse. Spend some time with them to see what they are like personally and temperament. If it's an open or shared backyard, you will need to take your puppy out on a leash. If you have any concerns, do either speak to your qualified veterinarian or dog behaviorist. Obedience training a beagle puppyPuppies learn much quicker than adult dogs, therefore start training as early as possible to get the best results. Here is our puppy Baylee, at home in Bracken's crate. Check your puppy over to make sure she seems in good health and doesn't have any injuries. Ikea is a great place to buy low-cost blankets.\$20/E15 Food ItemDescriptionAverage costPuppy Food - Raw or Kibble/Biscuit Before you collect your puppy, find out from your breeder what they are being fed. Right before bedtime, take them outside for a pee or poop, then place them in their crate or bed. Bored and high-energy beagles can become more mischievous, destructive, and develop anxiety. Walking can be a little stressful! Beagles who are not trained on the leash effectively can prove a challenge to walk. As soon as she returns to you give her praise and the treat.Repeat the above steps practicing both 'stay' and 'come' ensuring you reward her with praise and a treat each time. Ingredients in kibble usually include meat, grains, vegetables, and other materials. -BrushAlthough Beagles are short-haired and don't require lots of grooming, to remove excess hair, it's good practice to brush their fur once a week. Take her inside the house and let her have a wander around and a good sniff. Around children, they are good, very patient, and enjoy the interaction. Many beagles are rehomed each year, as people do find them hard work. Maybe this is your first puppy, or perhaps you are thinking about getting a pup but are unsure of what to expect. As you move your hand over her head she will eventually sit. This 11-step guide will take you through all the information you need to know when bringing your puppy home. You may beagle proof your house as discussed early in the post, but when you take them to other places, cafes, people's homes, etc. Below is a checklist, which you can use to make sure you have everything you need for a puppy. Amazon does an excellent returns service, so if unsure, you can try a couple out.\$10/E10ID TagIn the UK, it is illegal not to have a collar with an ID tag. I have made a designated spot outside and have trained them from the very start to go in the backyard. Her convenient size, adaptability, and happy, loving nature make her a wonderful family companion. You will have a puppy from at least eight weeks old, so training will be intense for the first few weeks and will require commitment. They have an immense sense of smell, one of the strongest in all the dog breeds, so they are often sniffing excessively, especially in new places. Pick a quiet and safe spot for your pup to sleep. Puppy's first night Leading up to bedtime, don't allow your pup to fall asleep. I used to find playing with them, not only kept them awake but also tired them out ahead of bedtime. This is an accurate description. So, it all sounds positive, but what's not good about them? They are challenging for the pup to get out, so are a great way to keep them entertained. Consider this information thoroughly and think about if that Beagle will fit into both your family and lifestyle. Always go and see the breeder before you commit to buying. If they don't relieve themselves put them straight back to bed with no cuddles, close the door and leave them. They have endless energy! Beagles need regular exercise, and the length of time you walk them should be increased as they mature into adult dogs. Show her the bed or crate she will be sleeping in, any positive behavior reward with a treat. Unfortunately, there are a lot of Beagles who desperately want to be adopted both in the UK and the US. Try not to smother your puppy but playing with her and giving her a gentle scratch is an excellent way to start bonding with her. The crate itself should not be so big that the puppy can pee or poop in a corner. Go for the puppy version as it's much softer than an adult, so less abrasive on their skin.\$10/E5 Other things to think about If you have a backyard that you are intending on using, make sure it's pup safe. Some home insurance providers don't cover damage done by pets, so check your details. Firstly, it is essential you puppy proof your house, so ensure all footwear is stored away, anything that's puppy height and therefore reachable such as books, ornaments, etc., place out of the way. Or for convenience you can buy prepacked raw for puppies, there are several suppliers online that supply good quality raw. Make sure you start crate training the moment they arrive in their new home. If the crying seems to go on longer, pop down, do not give them a cuddle when you see them, just pick them up and put them outside. She would blissfully sit in the crate enjoying her kong. It's entirely reasonable for your puppy to be nervous or even scared, she's just been taken from her mom and littermates. Our beagles have all come from the same reputable breeder. I'm not sure if that's down to luck or the beagle dog breed. I have been to good vets and bad vets. We used to fill a Kong up with some treats and give to our puppy Baylee while she was in the crate. So, take her to your designated place outside for her to go. They love a sniff and can become strong on the leash, effectively they end up walking you. Don't make a fuss, close the crate door, turn the light out and leave the room. That's quite understandable. When you find a potential vet, pop in and ask to have a look around. Many of these items you can purchase from your local pet store or alternative online pet stores such as Amazon. Beagles will have a soft, adoring pleading lookSoft and shiny coat, no bald patchesA movement that is deliberate, not stumbling or dragging her legsHealthy clean teethGood temperamentThe body should be firm with a solid feel Preparing for when you bring your beagle puppy home When your new Beagle arrives at its home for the first time, you need to make sure you have everything that your beagle will need. Continue to practice this, making sure you praise and reward her each time she lies down. However, I would never leave a child alone with any dog. How to deal with chewing Puppies like babies teethe, and so your puppy will look for ways to soothe her sore gums. When in doubt speak to your qualified veterinarian. Beagles are often described as loyal, merry little hounds. So, I got myself into a routine to take my puppy out every time she did one of those activities. Tip No 2: In the UK it rains a lot, so I kept a coat and appropriate footwear by the backdoor, to avoid wasting time getting myself ready to take my puppy outside! I also kept treats and poop bags in my coat pocket. Tip No 3: Every time I took my puppy outside to the designated area, I would call out the word 'empties.' c) Stay & Come Get some tasty treats and place one in your hand ready.Make sure your puppy is sat downStand in front of her and slowly back away. Luckily with all my Beagles, they have never tried to chew furniture. I could write a book on different occasions my beagles have got themselves into mischief and it's always has something to do with stealing food. Beagles are fantastic dogs to have in your family; they are cute and have such a lovely nature. Bracken, my first Beagle, had the pleasure of being introduced to two beagle puppies, Polly and Baylee (separately). If you decide to swap your puppy's food to something different, do this over 3-4 weeks and spread it over several short walks. Here are some helpful tips: Tip No. 1: Your puppy will need to relieve herself every hour from 8 weeks old. Make sure you have treats in your pocket to reward positive behavior and poop bags to pick up any poops on the walk. So why do Beagle puppies make such good pets? The moment she doesn't move, praise her and give her a treatRepeat steps 1-3 five times.You should start to notice you should be able to begin to create a larger gap between her and you. Keep plenty of antibacterial floor wipes; they are a quick and easy way to clean up your pup's mess. So, on the very first day, make sure you are at home for the whole day, have all the items listed above, and have a family member or friend accompany you to pick the puppy up. Some of the traits you see today, such as a strong sense of smell and endless energy, were beneficial qualities for hunting. It has saved me in some instances, thousands of pounds and removed the worry when something goes wrong, and you need a vet. How cute are these! Baylee is in there somewhere! Adopting Adopting a dog can be a rewarding experience. National Beagle Club According to the National Beagle Club of America beagle colors include tan and white; lemon and white; red and white; and chocolate and white. Baylee the pup chewing on a rope toy rather than our fingers or furniture! Nipping Your puppy will also try to chew you to soothe her teething gums. First day with your puppy Here comes the big day, the first day can be quite daunting for both puppy and parent, but that's OK and completely natural. Accidents inside the house will happen, never shout or get angry with your puppy if they mess in the house. Avoid them launching themselves off chairs or going up and down staircases. Step 4: Repeat steps 1-3 five times. As soon as she does pee or poop, reward her with a treat and lots of praise. We use Nutriment Raw for all our puppies and adult Beagles. If you believe that you won't be able to exercise them daily, you should reconsider Beagle ownership. There are three types of food you could feed your beagle pup: Raw food diet - raw meat, bones, fruits, and vegetablesDry kibble/biscuitWet tinned foods sometimes mixed with dry kibble Whichever feeding regime you go with for your puppy, the table below shows the number of times you should feed your puppy. If you purchase a beagle from a reputable breeder, she will be a blank canvas, you and your family will train her from scratch. If you are using a dog bed or basket, make sure they can't chew anything so remove cables, ornaments, food, house plants, and other items that your puppy might reach and eat.Thoroughly wash your puppy's feeding and water bowls, putting fresh water in the bowl ready.Check all the rooms in your house where they might go to ensure there is nothing they can reach and chew (as mentioned above).Remove any price tags or packaging off your puppy's new toys. If your backyard isn't secure, pop her leash on. Kibble is an excellent nutritional source after raw. For most kibble products, there is a puppy variant, which will consist of higher nutrients than the adult variant. Beagles will see this as a perfect opportunity to steal straight out of their hand. You will also need to think about taking some time off from work or having someone home for the first few weeks.
